Course Description
The 27th Annual West Virginia Addiction Training Institute (ATI) features current developments within the physical, emotional, social, and spiritual areas of addictive behavior. Special topics for 2016 include: emerging drugs of abuse, electronic cigarettes, substance abuse in the LGBTQ community, naloxone, interpersonal psychotherapy military population, pornography, chronic pain, microbiome and ethics. This course is designed for new and experienced professionals who are seeking a thorough review of both the established fundamentals of addiction and current approaches to working with the behavioral addictions and the substance abusing population. The training is valuable for those working or planning to work in the areas of mental health, addictions counseling, courts and corrections, school counseling, nursing and psychology.

Sponsored by the West Virginia University School of Medicine Department of Behavioral Medicine and Psychiatry, the WVATI provides social work, psychology and counseling 19.5 hours of continuing education credit for the three day attendance and 6.5 hours daily. Addiction and Prevention Professionals receive 23.4 hours for the full week and 7.8 daily.

Course Objectives
The goals of the ATI are to assist professionals in examining the increasing issues of addiction in the state; provide an up-to-date look at treatment strategies; and in turn add to their repertoire of effective therapeutic techniques in working with individuals, family, and community members affected by the disease of addiction.

Following this course, participants should be able to:
- describe the mechanism of action of street stimulants
- discuss arguments for and against ECIGS
- apply screening tools to be used with the LGBTQ clients
- understand the urgency of increasing access to naloxone and training to use it
- identify the four foci of interpersonal psychotherapy
- understand and utilize military culture specific language as a means of better understanding this population
- discuss potential mechanisms of microbiome impact on the CNS

Course Information
