

WVU Clinical Studies

Metabolic Syndrome Study

This study is designed to examine how the heart and blood vessels differ in people who are overweight, with poor cholesterol and glucose levels compared to people who are normal weight without cardiovascular conditions.

This study is currently recruiting.

You may be eligible if you fit into one of two groups:

Group 1 (if you have one of the following)

- Are overweight.
- Have high blood pressure
- A blood test will be performed to see if check your:
 - cholesterol concentrations
 - blood sugar concentrations

Group 2 (if you)

- Are normal weight.
- Have no heart conditions
- Are not taking any heart or blood pressure medications
- Are not regularly exercising

This study involves 2 visits to the WVU Human Performance Laboratory located at Robert C Byrd Health Sciences Center.

Qualified Participants will receive medical testing at no cost:

- Blood work
- Blood vessel function tests
- Heart function tests
- Blood sugar measurements
- EKG
- Exercise stress test

Compensation up to \$50.
