**Job title:** \_\_\_\_\_

**Department:** \_\_\_\_\_

**Principal investigator:** \_\_\_\_\_

**Email:** \_\_\_\_\_ **Phone:** \_\_\_\_\_

- I understand that high-temperature (>70 C or 160 F) water and air might be used for washing and drying the laboratory glassware/plasticware.
- I understand that corrosive acid and alkaline detergent is used during the washing cycle.
- Since the washer uses about 190 l (50 gal) of tap water and 95 l (25 gal) of purified water for each washing protocol, in order to reduce the waste of water and extend the life of the cartridges in the water purification system, I will use the washer responsibly.
- I understand that my safety depends on the correct use of personal protective equipment: heat resistant gloves, goggles, lab coats and safety compliant footwear.
- I have been instructed on the safe and correct use of the Steris Reliance 400.
- I will fill out the logbook completely every time I use this instrument.
- I will keep the access door to room 3130J locked at all times
- I will not use this equipment if it is malfunctioning and I will report any malfunction to Paolo Fagone (Rm 3120, Tel. 304-293-7728; e-mail: pafagone@hsc.wvu.edu).
