

A native of Italy, Dr. Antonio Palladino received his medical degree with highest honors from the University of Naples, Italy, and served his residency in Obstetrics and Gynecology at Baltimore City Hospital, University of Maryland Division.

As a faculty member in the Department of Obstetrics and Gynecology at West Virginia University from 1964-1974, Dr. Palladino served as vice-chairman and director of the student teaching program. He later served as a clinical professor and was on the staff at Monongalia General Hospital. From 1974 until his death in June 1991, Dr. Palladino practiced with Drs. Walter A. Bonney and Kamal M. Behnam in Morgantown. He was certified by the American Board of Obstetrics and Gynecology and the Italian Board of Obstetrics and Gynecology.

In December 1991, Mrs. Adriana Palladino established the Antonio Palladino Lectureship in Obstetrics and Gynecology. Mrs. Palladino, who trained in Italy as a pharmacist, was a volunteer at Ruby Memorial Hospital. She was a researcher in the Department of Pharmacology and Toxicology at the WVU Health Sciences Center from 1966-1970.

Obstetrician: Fact, Anecdote and Logical
Management*
Visiting Professor
Philip Samuels, MD

Friday, April 26, 2019

Featured Faculty

- 8:15am Dr. Ossama Elsaccar, Assistant Professor
"Journey With Gynecologic Laparoscopy"
Objective: Discuss the history of gynecologic laparoscopy
- 9:15am Dr. Krista Pfaendler, Assistant Professor
"Gynecologic Cancer Care in Sub-Saharan Africa"
Objective: Recognize differences in approach to screening and treatment of gynecologic cancer in low and middle income countries compared to high income countries
- 10:30am Dr. Sarah Dotson, Assistant Professor
"Labor Induction 2019"
Objective: Describe the current methods and traditional indication for labor induction

Philip Samuels, MD, is director of the Maternal Fetal Medicine Fellowship Program and director of the Obstetrics and Gynecology Residency Program. He is a professor of Obstetrics and Gynecology in the Division of Maternal Fetal Medicine at The Ohio State University Wexner Medical Center.

Originally from Corsicana, Texas, Dr. Samuels earned his medical degree from Texas Tech University School of Medicine, Lubbock, Texas. He completed his residency at Eastern Virginia Graduate School of Medicine, Norfolk, Va., followed by a fellowship at the Hospital of the University of Pennsylvania.

Dr. Samuels' clinical and research interests include the medical complications of pregnancy, especially neurological, hematological, renal, auto-immune and gastrointestinal (including liver). He has written book chapters and papers in these and other areas.

He is passionate about educating students, residents and fellows. He enjoys preparing them for lifelong learning, and teaching and modeling professionalism. His favorite part of medical education is bedside teaching.

Outside of medicine, Dr. Samuels enjoys spending time with family, gardening with native Ohio plants, bird watching, photography, theater and classical music.

For more information, or to meet with Dr. Philip Samuels, contact Dr. Leo Brancazio at lbrancaz@hsc.wvu.edu.

Thrombophilias and the obstetrician: fact, anecdote, and logical management

During pregnancy, a woman's physiology changes in such a way that she is at higher risk for venous thromboembolic events. Furthermore, women who are unfortunate enough to have inherited and/or acquired thrombophilias are even at higher risk. This thrombophilia can place the woman at increased risk for preeclampsia, fetal growth restriction, stillbirth, placental abruption, and recurrent miscarriage. The best management for these patients is poorly understood, this often leads to under- as well as over management. Dr. Samuels is a Maternal-Fetal Medicine Specialist who is nationally and internationally known for his expertise in these matters. His talk will provide the audience with a rational approach to these patients.

At the conclusion of this presentation, participants should be able to:

- List the different inherited thrombophilias and their approximate prevalence
- Describe the testing for the antiphospholipid antibody syndrome
- Recognize anticoagulation prophylaxis vs treatment
- Describe the importance of rapid diagnosis and treatment of thromboembolic phenomena

PAST LECTURERS

1993, Richard Sweet, MD
1994, Marshall Lindheimer, MD
1995, Jennifer Niebyl, MD
1996, Ronald Chez, MD
1997, Jerome Belinson, MD
1998, Frederick D. Frigoletto, Jr., MD
1999, Robert Cefalo, MD, PhD
2000, John Kennel, MD
2001, Robert Hatcher, MD
2002, William Droegemueller, MD
2003, Frank Chervenak, MD
2004, Cornelius "Skip" Granai, MD
2005, Ralph W. Hale, MD
2006, William Haffner, MD, USPHS
2007, Peter Quesenberry, MD
2008, Richard Legro, MD
2009, Gerald Schatten, PhD
2010, Charles Lockwood, MD
2011, Robert N. Taylor, MD, PhD
2012, Jerome F. Strauss, III, MD, PhD
2013, Errol Norwitz, MD, PhD
2014, Keith Inskeep, PhD
2015, Eli Y. Adashi, MD, MS, CPE, FACOG
2016, Loretta P. Finnegan, MD, LLD

CME CREDIT

The West Virginia University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The WVU Office of CME designates this live activity for a maximum of 4 AMA PRA Category 1 Credits. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The target audience for the Palladino Lecture will include our academic and clinical faculty, residents, midwives, nurse practitioners, and medical students doing their clerkship in our department. In addition, outside Family Medicine and Ob/Gyn physicians are invited and may attend.

*All those in a position to control content have indicated that they have no relevant interests to disclose.
